• FREE PROMPT PACK

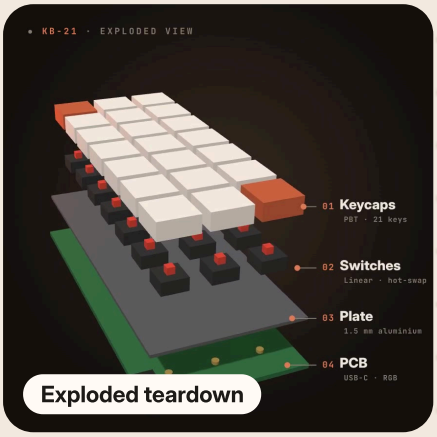

5 animation styles you'd *actually* use

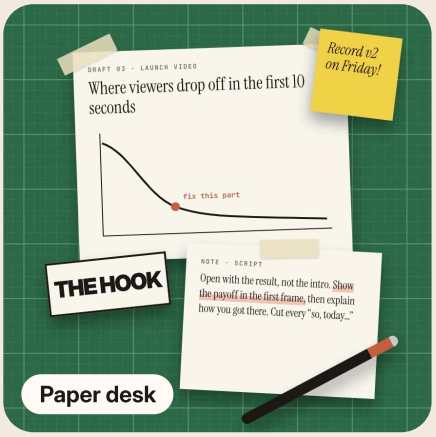

Every animation from the reel, as a copy-paste prompt. Swap the highlighted parts for your own text and you get the same style for your videos.

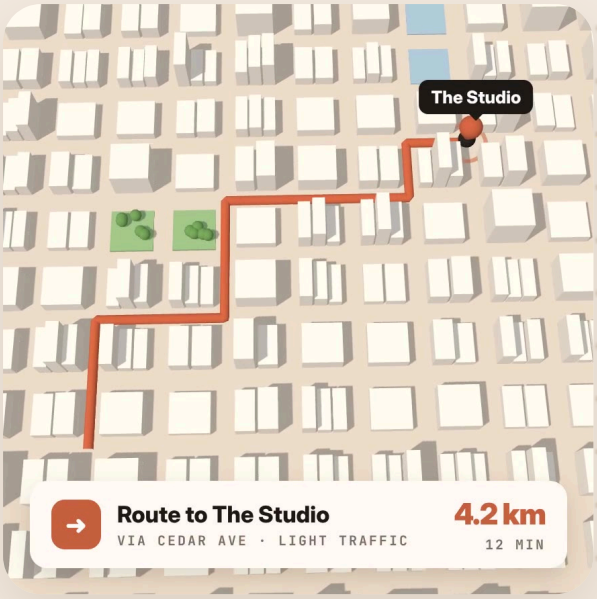

• HOW TO USE

1. Copy a prompt and paste it into Claude.
2. Replace the **highlighted** parts with your own content.
3. Ask Claude to preview it, then tweak ("slower", "brand colours", "vertical 9:16").
4. Screen-record the preview, or ask for it as a video you can drop into your edit.

• STYLE 01 / 05

Map *route*

WHAT IT DOES

3D city · route draws · pin drops

COMMAND IN THE REEL

`/map-route`

BEST FOR

Travel vlogs · Store locators · Delivery explainers

• COPY THIS PROMPT

Create a 5-second square HTML animation with Three.js: an overhead 3D city of white block buildings on a warm beige ground, a few green parks, soft shadows. A thick terracotta route line draws along the streets from a "You" marker to a pin labelled "[DESTINATION]", with a pulsing dot at its head. The camera slowly drifts and zooms in. A card at the bottom shows "Route to [DESTINATION]" and a counter rolling up to [X km · Y min]. One self-contained HTML file.

MAKE IT YOURS

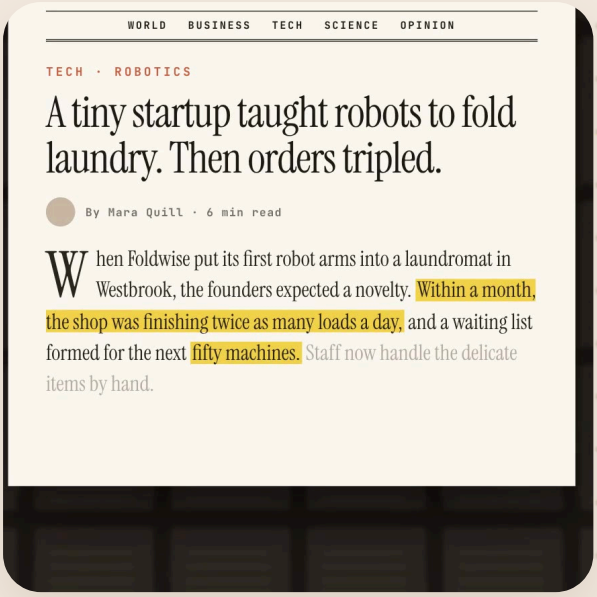

Swap the route colour for your brand colour and rename the streets in the card.

GO FURTHER

Ask for "a second route in grey for comparison" or "night mode with lit windows".

• STYLE 02 / 05

Headline *highlight*

WHAT IT DOES

Paper slides in · push-in · line highlighted

COMMAND IN THE REEL

`/headline`

BEST FOR

News recaps · Case studies · Reaction videos

• COPY THIS PROMPT

```
Create a 5-second square HTML animation: a newspaper page called "[PAPER NAME]" slides in at an angle over a blurred dark background of other papers, straightens, then the camera pushes in. Serif headline: "[YOUR HEADLINE]". After the push-in, a yellow highlighter sweeps across one key sentence, then a second short phrase. Off-white paper, black serif type, drop cap. One self-contained HTML file.
```

MAKE IT YOURS

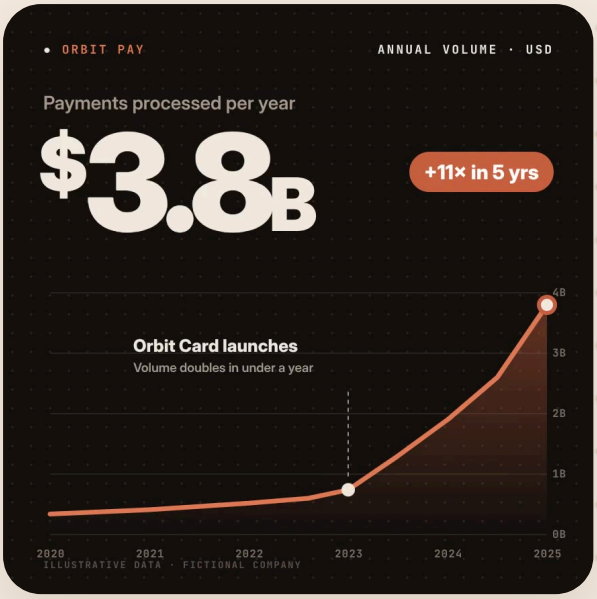

Paste your own paragraph and say exactly which sentence gets highlighted.

KEEP IT HONEST

Use invented paper names. Don't fake real outlets or real headlines.

• STYLE 03 / 05

Big *stat* + chart

WHAT IT DOES

Counter rolls up · line draws · one callout

COMMAND IN THE REEL

`/stat-chart`

BEST FOR

Startup stories · Finance · Growth recaps

• COPY THIS PROMPT

```
Create a 5-second square HTML animation on a dark dotted background: a
huge number counts up from $0 to [$3.8B] while a terracotta line chart
draws left to right with a soft gradient fill underneath. Halfway, a
dashed callout appears at the turning point saying "[EVENT]". At the
end, a pill pops in: "[+11× in 5 yrs]". Small label: "[COMPANY] ·
annual volume". One self-contained HTML file.
```

MAKE IT YOURS

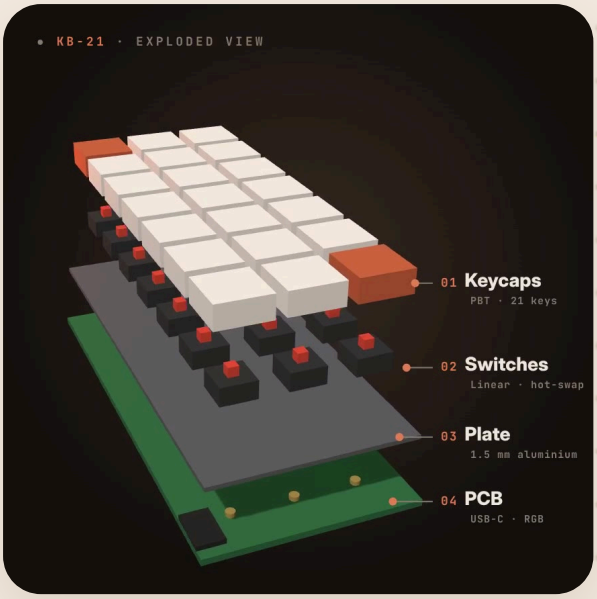

Give it your real data points as a list of years and values, and it plots them exactly.

GO FURTHER

Ask for "two lines, us vs competitor" or "bars instead of a line".

• STYLE 04 / 05

Exploded *teardown*

WHAT IT DOES

Product separates · every layer labelled

COMMAND IN THE REEL

`/teardown`

BEST FOR

Product reviews · Launches · How it works

• COPY THIS PROMPT

```
Create a 5-second square Three.js animation on a dark background: a [mechanical keyboard] sits assembled, then its layers separate vertically ([keycaps, switches, plate, circuit board]) while the camera slowly orbits. As each layer settles, a label slides in on the right with a thin leader line: number, part name, one spec. Accent colour terracotta. One self-contained HTML file.
```

MAKE IT YOURS

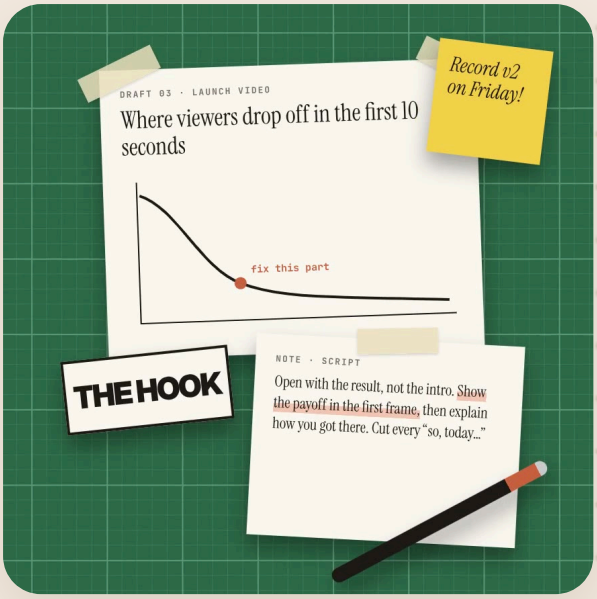

Works for anything with layers: a phone, a burger, a website stack, a business model.

GO FURTHER

Ask it to “reassemble at the end” for a satisfying loop.

• STYLE 05 / 05

Paper *desk*

WHAT IT DOES

Notes + chart pinned on a cutting mat

COMMAND IN THE REEL

`/paper-desk`

BEST FOR

Tutorials · Planning · Storytelling

• COPY THIS PROMPT

```
Create a 5-second square HTML animation: a green cutting mat with grid lines. Paper notes drop onto it one by one with a slight bounce and rotation, held by bits of tape: a note with a hand-drawn line chart that draws itself, a bold "THE HOOK" label, a script note with one underlined line, and a yellow sticky note saying "[REMINDER]". A pen slides in at the end. One self-contained HTML file.
```

MAKE IT YOURS

Replace the notes with your own script points or lesson steps.

GO FURTHER

Ask for a wooden desk or a cork board instead of the cutting mat.

• BEFORE YOU GO

Make it *vertical*

All 5 prompts make square animations. For reels and shorts, add this line to the end of any prompt:

• ADD-ON

```
Make it 1080×1920 (9:16 vertical), keep all key content in the middle
1080×1350, and render it as a 30fps MP4.
```

SLOWER OR FASTER

Add "make it 8 seconds" or "make every move snappier".

YOUR BRAND

Add "use these colours: #hex, #hex" and your font name.
