• FREE PROMPT PACK

Text that *actually* hits

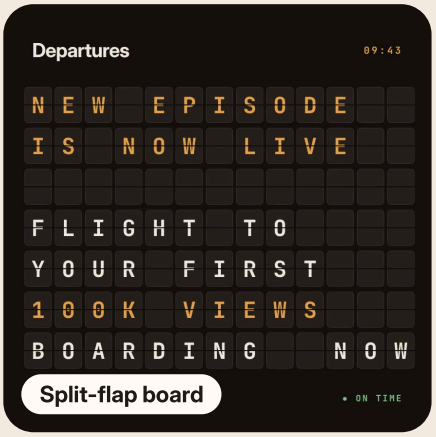

Every text animation from the reel, as a copy-paste prompt. Swap the highlighted parts for your own text and you get the same style for your videos.

• HOW TO USE

1. Copy a prompt and paste it into Claude.
2. Replace the **highlighted** parts with your own content.
3. Ask Claude to preview it, then tweak ("slower", "brand colours", "vertical 9:16").
4. Screen-record the preview, or ask for it as a video you can drop into your edit.

• STYLE 01 / 05

Kinetic *typography*

WHAT IT DOES

Words punch in with rhythm and colour

COMMAND IN THE REEL

`/kinetic-type`

BEST FOR

Reel hooks · Intros · Ads

• COPY THIS PROMPT

```
Create a 5-second square kinetic typography animation with GSAP on a dark background. A terracotta panel wipes away, then these lines appear one by one, centred and huge: "[STOP]" drops in letter by letter with a bounce, "[scrolling.]" slides in from the right, "[This takes]" rises up, and "[5 sec.]" pops in with an elastic scale in an italic serif font in terracotta. A thick underline draws under it, the first word turns terracotta, and the lines give small shakes and wiggles to the beat. One self-contained HTML file.
```

MAKE IT YOURS

Use your own hook in 3–4 short lines. Each line gets its own move.

GO FURTHER

Ask it to "sync each word to 120 BPM" so it lands on the beat of your track.

• STYLE 02 / 05

Quote *card*

WHAT IT DOES

Words fade in · name slides in

COMMAND IN THE REEL

`/quote-card`

BEST FOR

Interviews · Podcasts · Motivation

• COPY THIS PROMPT

```
Create a 5-second square HTML animation: an off-white rounded card rises onto a beige dotted background and a big terracotta opening quote mark pops in. The quote "[YOUR QUOTE]" appears word by word in a large serif font, each word fading in from a blur, with [1-2 key words] in terracotta italics. Then a short line draws, and the attribution slides in: a dark circle with initials, "[NAME]" and "[ROLE]" in small caps. A small label "[QUOTE OF THE WEEK]" fades in at the bottom-right. One self-contained HTML file.
```

MAKE IT YOURS

Quotes from your own guests or your own words work best.

KEEP IT HONEST

Only use real quotes from real people with their permission, and never invent quotes for real people.

• STYLE 03 / 05

Typewriter *script*

WHAT IT DOES

Text types onto paper · stamp lands

COMMAND IN THE REEL

`/typewriter`

BEST FOR

Storytelling · Scripts · Announcements

• COPY THIS PROMPT

Create a 5-second square HTML animation: a sheet of off-white paper sticks out of a dark typewriter body at the bottom of a warm brown background. This text types onto it character by character in a bold typewriter font, with a terracotta cursor and the paper scrolling up as new lines appear: "[INT. TINY STUDIO - NIGHT / A laptop glows. One idea. / Zero followers. / SHE hits publish anyway.]". When the typing ends, a red "[APPROVED]" rubber stamp slams onto the page. One self-contained HTML file.

MAKE IT YOURS

Use it for a story opening, a product announcement or a letter to your audience.

GO FURTHER

Ask for "typing sounds timed to each key" if you export it with audio.

• STYLE 04 / 05

Glitch *title*

WHAT IT DOES

Scrambled RGB glitch resolves to a title

COMMAND IN THE REEL

`/glitch-title`

BEST FOR

Series intros · Gaming · Tech drops

• COPY THIS PROMPT

```
Create a 5-second square HTML animation on a near-black background with faint scanlines. The title "[SYSTEM UPDATE]" starts as scrambled random characters with red and cyan copies split apart, horizontal slices shifting sideways and flickers. Letters lock in left to right until the title is clean and white. Then a subtitle "[EPISODE 07 · NOW STREAMING]" fades in with its letter-spacing tightening, and two more short glitch bursts hit later. A small "• REC" timecode sits top-left. One self-contained HTML file.
```

MAKE IT YOURS

Short titles (1–2 words or under 14 letters) look the strongest.

GO FURTHER

Ask for "the glitch to reveal a logo" or "a VHS tracking-line look".

• STYLE 05 / 05

Split-flap *board*

WHAT IT DOES

Airport board flips into a message

COMMAND IN THE REEL

`/split-flap`

BEST FOR

Milestones · Launches · Travel

• COPY THIS PROMPT

Create a 5-second square HTML animation of an airport split-flap departures board on a dark background, with a "Departures" header and a ticking clock. A grid of [7] rows × [13] flap tiles shows random characters, then each tile flips through letters (with a visible flap folding down) and lands on this message, row by row: "[NEW EPISODE / IS NOW LIVE / (blank) / FLIGHT TO / YOUR FIRST / 100K VIEWS / BOARDING NOW]". Highlight rows [1, 2 and 6] in amber. Footer: "[GATE B · TERMINAL 2]" and a green "• ON TIME". One self-contained HTML file.

MAKE IT YOURS

Keep each row to 13 characters or fewer. Count them before you paste.

GO FURTHER

Ask for "a slow flip sound" or "a train station board in a different colour".

• BEFORE YOU GO

Make it *vertical*

All 5 prompts make square animations. For reels and shorts, add this line to the end of any prompt:

• ADD-ON

```
Make it 1080×1920 (9:16 vertical), keep all key content in the middle
1080×1350, and render it as a 30fps MP4.
```

SLOWER OR FASTER

Add "make it 8 seconds" or "make every move snappier".

YOUR BRAND

Add "use these colours: #hex, #hex" and your font name.
